

# The StressCrete Group

## Benefits of Concrete

- All poles are engineered to the purchaser's specification and delivery requirements
- Overall significant cost savings can be realized on a direct embedded concrete pole
- Airborne Acidities/Acidic Soils/Salt are not factors in deterioration due to our mix design and the designed strength of the pole
- Individual installation designs will be done at no cost to the purchaser
- Mass of concrete poles minimizes vibration
- Stiffness of concrete pole produces minimum deflection/movement
- Environmentally Friendly
- Customer has a choice of colors for their pole. The color comes from aggregate and pigment going through the pole.
- Zero Maintenance
- Lifetime Warranty
- Aesthetically Pleasing
